

FRANKLIN
CLEANING TECHNOLOGY

CRISP™ Chewing Gum Remover

This quick freezing type formula simplifies the messy task of removing gum and other soft sticky materials from carpets, floors, cement, furniture, tables and clothing. Crisp™ is also excellent for removal of candle wax. Once the material is frozen it loosens and can be scraped away with a spatula or knife. Ideal for use in schools, hospitals, hotels, motels, offices, restaurants, locker rooms, restrooms, theaters, churches and industry.

COST EFFECTIVE

Reduces the labor that is involved with chewing gum removal.

HIGHLY EFFICIENT CLEANER

Chewing gum becomes hard and brittle at sub-freezing temperatures.

USER FRIENDLY

Ready-to-use aerosol package simplifies application. The supplied extension tube makes application even easier.

DIRECTIONS FOR USE

1. **SPRAY** directly on gum until it is completely frozen. Once gum is frozen it loses its adhering tack and can be scraped away with a knife or spatula.

PRODUCT SPECIFICATIONS

pH (concentrate) N/A
Color Clear
Fragrance None
Physical State Liquid Under Pressure
Freezing Point $<0^{\circ}\text{F}$
Solubility in Water Insoluble
Warehouse Storage Level III Aerosol
Flash Point -155°F

PRODUCT AVAILABILITY

F426015 12/5 oz.
